Script-Fu and plug-ins for The GIMP
AutoIt v3 is a freeware BASIC-like scripting language designed for automating the Windows GUI and general scripting. It uses a combination of simulated keystrokes, mouse movement and window/control manipulation in order to automate tasks in a way not possible or reliable with other languages.

Script-Fu and plug-ins for The GIMP
One of the big advantages of The GIMP is the fact that it can be easily extended with new functionality. However, it is not easy to find documentation about this. I will cover the default scripting extension Script-Fu and some details for programming plug-ins in C.
