Chemical is a unique haste server, showcasing the limitations of WoW emulation by utilizing never before seen systems and functions.

Chemical Peel: Purpose, Procedure, Risks, Results

A chemical substance is any material with a known chemical composition. For example, water has the same properties and the same ratio of hydrogen to oxygen whether it came from a river or was made in a laboratory. Typical chemical substances found in the home include water, salt (sodium chloride) and bleach. Generally, substances exist as a solid, a liquid, or a gas, and may change between these ...

Kerti - Chemical (Audio)

The CLP Regulation ensures that the hazards presented by chemicals are clearly communicated to workers and consumers in the European Union through classification and labelling of chemicals.
